

Guide

1. Run createData.R → own data set is created
2. Open promptData.R:
 - The final data set is on top (just in case, you want to load)
 - Load the own created data: india_new.csv

	Completions	Go for manual checking	Checked
First time	GPT_prompt_completion.Rdata	GPT3india_manualcheck.csv	GPT3india_manual_checked.csv → created new csv: GPT3india_manual_resample.csv
Resample	GPTindia_prompt_resample.Rdata	GPT3india_manualchecks_resample.csv	GPT3india_manual_resample_checked.csv → Created new csv: GPT3india_manualchecks_resample_merged.csv → GPT3india_manual_resample_checked_all.csv
Second resample	GPT_prompt_resample_2.Rdata	GPT3india_manualchecks_resample_2.csv	GPT3india_manual_resample_2_checked.csv
FINAL		GPT3india_finalmanual.csv	GPT3india_final.csv

- Final: GPT3_data_complete_2019.Rdata

3. Run Plots.R to get the analysis part
